

WORLD CITIES SUMMIT 2021 PREVIEW

To Build Resilient City Infrastructure, Look to Ancient Roman Aqueducts for Inspiration

COVID-19, the climate crisis, social shifts and new technologies have shaken the world. Minister Indranee reflects on Singapore's experience with Dr Cheong Koon Hean and the importance of creating a green and resilient future through comprehensive city and infrastructure planning and working with the international community and citizens, for cities to continue thriving despite disruption.

The Business Case for Addressing Climate Risk

Climate resilience cannot be undertaken by one entity alone. Our speakers share the business case for companies to commit to climate resilience and the importance of science and data not only to inform policies, but also to report corporates' performance on their environmental, social and corporate governance goals.
