

## CONFERENCE

### In Conversation with DPM Heng Swee Keat

How can cities respond to the pandemic, climate crisis and other disruptions to emerge more sustainable and resilient? Singapore's Deputy Prime Minister shared the city-state's experience in his keynote address for this year's World Cities Summit, jointly organised with the Singapore International Water Week and Asia Infrastructure Forum.

## UPCOMING WCS WEBINAR

### Making Sense: Leveraging the Science of Cities

#### KEYNOTE SPEAKER

**Peter Ho**  
Chairman  
Urban Redevelopment  
Authority, Singapore

#### MODERATOR

**Aaron Maniam**  
Deputy Secretary  
Ministry of Communications  
and Information, Singapore

#### PANELLISTS

**Daniel Plato**  
Executive Mayor  
Cape Town

#### Prof Tim Stonor

Managing Director,  
Space Syntax

#### Eva Gladek

Founder and CEO  
Metabolic

#### Cashfya Cazi

Global Technology Leader,  
Urban Strategies  
Jacobs

Cities are complex entities where urban systems and people interact in ways that are often out of sight and seemingly random. Can a science of cities help us understand how cities work in a quantitatively predictable way? Can advanced analytics and modelling tools using big data guide policymakers and urban planners to address complex urban issues such as transportation, health, and housing?
