PUBLICATION LAUNCHES AT WCS 2022

Urban Solutions #21: Emerging Stronger

Cities are at the frontline of the climate crisis, and womb to the innovations and resources needed to spawn solutions. How then can cities create sustainable futures fast enough, while emerging stronger in the process? Featuring interviews and guest articles by city leaders and experts, the latest issue of Urban Solutions explores the vision of a stronger and sustainable urban future.

ETHOS Issue 24: The Future of Urban Sustainability

In an era of climate impact and deepening energy and resource constraints, what can we do to make our cities more sustainable and liveable places to be? This special issue of ETHOS by the Civil Service College in collaboration with the CLC explores the theme of urban sustainability, with insights from city leaders, public sector practitioners and urban experts from around the world.

PPPs have significantly boosted infrastructure investments and accelerated economic growth in developing countries. Source: Ernie / Flickr

In Advancing Sustainable Urbanisation, How PPPs Could Work

Public-private partnerships (PPPs) have been key in enabling urban infrastructure building and public services delivery. Focusing on sustainable urbanisation, Tongji University's Professor Zhu Dajian proposes a three-element framework that could make PPPs work for sustainable urban development.
