PUBLICATION LAUNCHES AT WCS 2022

Building Community Resilience

Recognising that there can be no resilient city without a resilient community, this playbook documents the CLC's exploration into developing a multi-stakeholder framework to measure and build social capital and community resilience in the built environment.

The Future of Urban Sustainability: Implications for Governance

How might we continue to build sustainability and liveability for our people, in the face of local and global shifts, climate change, resource pressures, changing societal values and other discontinuities? The CLC's Foresight team has identified and developed a set of discontinuities and trends as a starting point for future cities to develop plausible scenarios and improve urban sustainability.
