

Urban Solutions #22: Building Partnerships

As cities around the world emerge fully from the pandemic, they are faced with more complex urban challenges, such as the growing impact of climate change, ageing societies, supply chain disruptions and economic uncertainty. This edition of Urban Solutions spotlights the role of action-oriented partnerships in helping cities become more resilient against emerging issues.

How can drivers dislodge their entrenched relationship with cars in Singapore?

Dr Samuel Chng, from the Singapore University of Technology and Design (SUTD), urges us to challenge our relationships with cars, especially when Singapore has made inroads towards achieving sustainable mobility.

The article was first published on 26 March 2023, by Channel News Asia (CNA) Digital. It builds on the insights from roundtable sessions held as part of a project on the future of sustainable mobility, organised by CLC and the Land Transport Authority.

Key Takeaways from the World Cities Summit 2022 Science of Cities Symposium: Regenerative Cities

The second panel at the inaugural World Cities Summit Science of Cities Symposium explored how the design of thriving regenerative cities needs to address climate change and urbanisation impacts, which result from human activities. Presenters on this panel discussed the principles and integrated strategies, designs, and innovations to enable a regenerative approach to cities.

Integrated Data Systems for Urban Planning and Management – Ho Chi Minh City

In 2018, Ho Chi Minh City (HCMC) became one of 26 pilot cities to join the ASEAN Smart Cities Network (ASCN). Since then, its smart city ambitions have grown from strength to strength through its smart city projects and roadmap, for which the city is preparing to enter the second phase in 2021–25. Even before this, HCMC's efforts over the years in the direction of data openness and interoperability helped it build a strong foundation for further smart city development.
