

# CREATING A REGENERATIVE CITY

The Centre for Liveable Cities and Ramboll are organising the Urban Lab Singapore – the first of its kind in the region – which brings together thought leaders from the public, private and academic sector in an innovative knowledge generation process on regenerative urban development approaches. As a lead up to the Urban Lab, this lecture will explore the transformative power of regenerative design in shaping sustainable, resilient, and thriving urban spaces.

In this lecture, the speakers will:

- Introduce the key principles of regenerative design and how it can be applied in urban planning;
- Explore innovative regenerative design strategies for various urban sectors, with practical examples of how they can be applied and measured in a Singapore-specific context;
- Share insights from the field of regenerative design.

Sign up today and take the first step towards a more regenerative future!

15 January 2024 | 2.30pm - 4pm, GMT+8
