

**Glasgow: Leading the UK's Race to Net-Zero Carbon**  
**8 October 2020, 4.00 pm – 4.40 pm SGT (GMT+8)**

Speakers: Professor Greg Clark CBE, Chairman, Connected Places Catapult  
Susan Aitken, Leader, Glasgow City Council

**Fireside chat questions:**

1. What will happen at COP26 and what does it mean to Glasgow to host and stage this gathering?
2. How is Glasgow using COP26 to accelerate its own zero carbon agenda?
3. Has COVID19 made this task easier or more difficult? How?
4. What are the links between reducing carbon and increasing liveability? Does one help the other?
5. What business and job creation opportunities does a drive towards a zero-carbon city create?
6. How does technology help? Glasgow is a great city of invention, will this lead to new discoveries or applications?
7. How will Glasgow look and feel different as the path toward Zero Carbon is accelerated?
8. What might other cities learn from Glasgow's experience? Are there any particular lessons for other 'former industrial' cities that are important?
9. You are taking multiple initiatives on housing in the city. What are you prioritising and why?
10. One part of your strategy has been to grow the city centre resident population. Why is that important and how is it progressing?
11. Glasgow is a proud city with a strong community identity. How will the Glaswegian people be engaged in this process?
12. Are there any stubborn challenges to be overcome? How are you addressing them?
